- NOTES**
- 1. Private LSLR work includes reconnection to existing curb stop and internal house plumbing.
 - 2. Payment for private side LSLR shall be made as a lump sum payment for replacements up to 20 LF. Additional length paid on a LF basis.
 - 3. Internal plumbing improvement include installation of a new backflow preventer, pressure regulator and expansion tank.
 - 4. ACHD inspection includes all labor and costs for permit application; associated fees; final inspection, and any modifications, rework required, or follow-up inspections required to rectify a failed inspection.
 - 5. Private side restoration (aside from public sidewalk) is not included in the cost of the work.
 - 6. Home owner and contractor should both initial each item indicated under Cost Proposal Documentation to document that the information was discussed and / or provided.
 - 7. By submitting this Cost Proposal, contractor acknowledges that he has not received any downpayment from the home owner for replacement services or materials.
